

smârtROLLER

Automatic Gravity-feed Shelf Management System

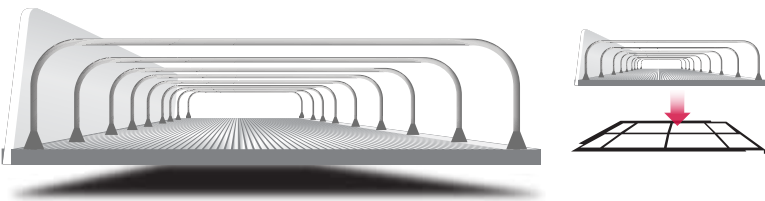

SmartRoller™ can be installed on the shelves directly. Its unique and easy-to-use design that employs gravity feed to pull products to the shelf front automatically. Good for heavy and fast selling products, such as cans and dairy products etc. This helps to improve back feeding systems as well as labour saving.

Roller Types

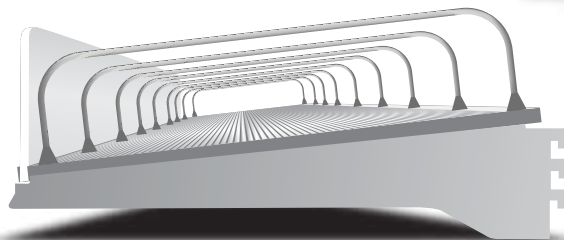

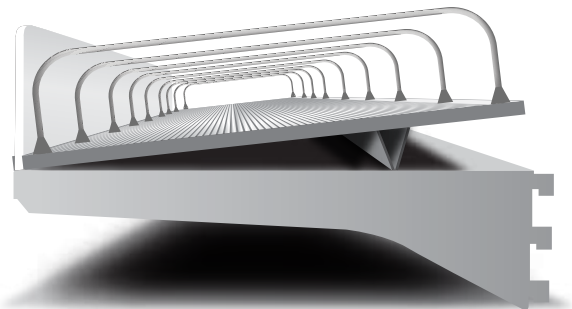

Over-Shelf Version

Roller can be installed on any display shelf that can set angles for gravity assistance

Angle-adding Version

Roller can add angle units to create gravity assistance

Combined-to-Shelf Version

Roller is combined together with the shelf that can be installed on site

Benefits with using **smârtROLLER**

Automatic Gravity-feed Shelf Management System

Journal of Business Management & Social Sciences Research
 "The consumers are more inclined to purchase the product which is efficiently displayed"

An effective shelf management system can influence consumer buying decisions by attracting consumer attention, facilitating product inspection and selection as well as allowing the access of several shoppers at once.
